major environmental impact from the waste is likely to be associated with the use of the waste / material / resource in the manufacture of different products or from the disposal itself. In practice, studies of such a kind of impact are often hampered by the complexity of the waste itself, the nature of the waste in question and the way in which it is used. Thus, the need to assess the environmental impact of waste disposal has been identified as one of the major tasks of waste management.

1. *What is the purpose of the study?*
 2. *What are the research objectives?*
 3. *What is the research methodology?*
 4. *What are the results of the study?*
 5. *What are the conclusions of the study?*
 6. *What are the limitations of the study?*
 7. *What are the implications of the study?*
 8. *What are the future research directions?*
 9. *What are the contributions of the study?*
 10. *What are the key findings of the study?*
